Education

B.Tech in Electronic communication and Engineering
SR University

Intermediate (MPC) at TSWREIS (COE)
GPA: 9.5

High School at MJPTBCWREIS
GPA: 9.8

Skills

- Digital & Analog Electronics
- Circuit Design
- Microcontroller Basics
- Embedded Systems
- C Programming
- Python (Basics)
- PCB Design (Basics)
- Soldering
- Hardware Handling
- Communication Systems (Fundamentals)
- Problem-Solving & Teamwork

Languages

English
Telugu
Hindi

About Me

I am an Electronics and Communication Engineering student at SR University with a strong foundation in circuits, communication systems, and applied mathematics, seeking an entry-level opportunity to apply my technical and problem-solving skills in real-time projects.

Objective

To start my career as a graduate engineer in electronics or communication, using my skills in circuit analysis, basic semiconductor devices, and applied mathematics to support design, testing, and improvement of electronic systems.

Experiences

Completed practical projects on half-wave and full-wave rectifiers, diode clippers, and photodiode light sensing circuits. Developed a smart medicine reminder prototype using microcontroller interfacing. These experiences enhanced my skills in circuit design, signal processing, and embedded systems.

Achievements

Completed a summer internship at Texas Instruments focused on device reliability testing. Excelled in core electronics and communication courses with top grades. Presented technical posters on integration methods and photodiode experiments in university labs. Developed a financial plan and business model for an online grocery startup as part of entrepreneurship coursework. Demonstrated strong research, communication, and project management skills throughout academic and practical experiences.
